

AMENDMENTS TO THE CLAIMS

1-7. (Cancelled)

8. (Currently Amended) A method for inhibiting lipase-inhibitor comprising:
administering a pharmaceutical composition or food containing as the active ingredient at least
one ingredient selected from the group consisting of an LUU type triacylglycerol and a UUL
type triacylglycerol to a human or animal subject, triacylglycerols (i.e., asymmetric
triacylglycerols composed of wherein L which represents a long-chain saturated fatty acid having
from 16 to 22 carbon atoms and U which represents an unsaturated fatty acid having from 16 to
22 carbon atoms).

9. (Currently Amended) A method for inhibiting lipid absorption inhibitor comprising:
administering a pharmaceutical composition or food containing the asymmetric triacylglycerol
described in claim 8 as the active ingredient at least one ingredient selected from the group
consisting of an LUU type triacylglycerol and a UUL type triacylglycerol to a human or animal
subject, wherein L represents a long-chain saturated fatty acid having 22 carbon atoms and U
represents an unsaturated fatty acid having from 16 to 22 carbon atoms.

10-19. (Cancelled)
